**Subject:** FW: Senator Boxer letter and questions regarding West, Texas facility incident

OEM is coordinating with the Region and OGC. OSWER requested an extension, but Randy heard back that OCIR will not provide an automatic extension. Per Randy's communication with OCIR, we are expected to produce the responses we can complete by the due date. An interim letter with the responses we could complete by the due date would be transmitted with a commitment to provide the rest of the responses at a later date.

When you circulate the letter that came to CSB, can you please include me? Thank you. Becky

**Subject:** Senator Boxer letter and questions regarding West, Texas facility incident

I have attached a letter and series of questions from Senate EPW Committee Chairman Boxer regarding the West, Texas facility incident. OEM should take the lead in responding to the questions. The letter asks for final responses by Thursday, May 16. Rather than provide long lists of chemicals pursuant to some of the questions, we can provide web links if the information is available on-line. Since we may need Regional input and OGC input, and will need OSWER IO review, we will need to factor that into the response timeline. If you have questions, please let me know. Thank you.
